

School arrival and dismissal times can be hectic, chaotic, and potentially unsafe, often resulting in frustrated students, parents, and school staff. A site assessment by **Clearzoning®** can lead to effective, efficient, and safe solutions to school traffic circulation.

Clearzoning® staff have observed common situations at private and public schools:

- **Walking to school is often discouraged by conflicts with vehicular traffic.** We can recommend ways to best manage a variety of conflict areas where vehicular and pedestrian traffic converges.
- **Increased traffic makes school ingress and egress more difficult.** We have site planning expertise and can address access, parking, and circulation challenges. We seek out safe and cost-effective solutions.
- **Schools need solutions now.** We can perform an initial assessment in 15 business days or less.

Clearzoning® is a Michigan-based consulting firm with a 23-year record of helping municipalities and school districts make sense of their traffic problems. Our staff collectively has over 75 years of traffic planning and traffic engineering experience.

We offers several ways to solve problems. Examples include the following:

- Evaluate current conditions and provide a written assessment
- Listen to school staff and other stakeholders to fully understand concerns
- Develop mitigation alternatives (new signs, pavement markings, concept plan, etc.)
- Evaluate warrants for turn lanes and/or signals
- Prepare a traffic impact study
- Develop a Safe Routes to School program
